John was diagnosed on February 15th, 2018 with a brain tumor. In the beginning of March, John underwent surgery at UW to remove one of the tumors and the pathology came back as a stage 2 astrocytoma primary brain tumor. Sadly, there were additional tumors and John went through 18 days of whole brain radiation. In July, John's MRI report showed additional tumors that are fast growing and as a result, he was placed on hospice to ensure that he remains comfortable in the months ahead.
